**KG-FT-DFS**

**Brand**  
KONGIA

**Type**  
Metal stripper for flat FTTH drop cable

**Body material**  
Metal

## Key features

- Metal body for FTTH drop cable preparation.
- Compatible with indoor flat cable of 3 x 2 mm and 1 or 2 fibers.
- Fiber with 125 µm cladding
- coating or buffer of 0.25 mm and 0.9 mm.
- Integrated graduated ruler to control preparation length.
- Compact 25 x 110 x 20 mm format with coated handles.
- Reference blade life of approximately 1,000 cycles with metal reinforcement.

|----------------------------------------|------------------------------------------------------------------------|
| Compatible cable                       | Indoor flat drop cable, 3 mm wide x 2 mm high                          |
| Fiber count                            | 1 or 2                                                                 |
| Glass cladding diameter                | 125 µm                                                                 |
| Compatible coating or buffer diameters | 0.25 mm and 0.9 mm                                                     |
| Reference dimensions                   | 25 mm wide x 110 mm long x 20 mm thick                                 |
| Reference blade life                   | Approximately 1,000 cycles with metal-reinforced cable; depends on use |
| Length guide                           | Integrated graduated ruler                                             |
| Handles                                | Coated for easier grip                                                 |
| Application                            | FTTH drop cable preparation                                            |
| Warranty                               | 5 years                                                                |

## Applications

### Indoor FTTH drops

End preparation for flat drop cable of 3 x 2 mm with 1 or 2 fibers.

### Installation and maintenance

Jacket removal and length control using the integrated ruler.

### Connector installation at the subscriber outlet

Prepare the drop cable section entering the outlet before fitting the compatible connector and strain relief.

### Drop cable rework

Remove the jacket from a new end when replacing a damaged termination, retaining enough length to house it in the box.

## Packaging & contents

1 KG-FT-DFS stripper KONGIA packaging User guide

## Warranty

KONGIA 5-year warranty.

## Declared compliance

RoHS · ISO 9001 · REACH · CE Compliant
