Stated weight per kit	200 g
Package volume	324 cm³
Sales unit	1 kit of 10 rods with accessories
Use	Manual cable routing in hollow walls, suspended ceilings and compatible raceways
Working condition	De-energized circuits; the tool is not electrical protective equipment

Applications

Hollow walls
Guide cabling through cavities and prepared access points during installations or renovations.

Suspended ceilings
Connect the required sections to take cabling to compatible access points.

Junction boxes
Use the appropriate head or loop to guide and retrieve cable in accessible spaces.

Cabling under raised floors
Join the required rods to reach an accessible opening and route cable between access points without dismantling the entire run.
