Package volume	576 cm ³
Sales unit	1 kit of 10 rods with accessories
Use	Manual cable routing in hollow walls, suspended ceilings and compatible raceways
Working condition	De-energized circuits; the tool is not electrical protective equipment

Applications

Hollow walls

Guide cabling through cavities and prepared access points during installations or renovations.

Suspended ceilings

Connect the required sections to take cabling to compatible access points.

Junction boxes

Use the appropriate head or loop to guide and retrieve cable in accessible spaces.

Cabling under raised floors

Join the required rods to reach an accessible opening and route cable between access points without dismantling the entire run.
