Type	3-strand braided fish tape
Fish tape material	Plastic-steel, 3-strand braided construction
Construction	Three braided strands in red and black
Nominal length	15 m
Nominal fish tape diameter	6 mm
Terminal type	Flat tip with elongated eyelet

Technical specifications

Parameter	Specification
Nominal flat terminal width	9 mm
Nominal flat terminal length	20 mm
Nominal eyelet dimensions	9.5 × 5.5 mm
Flexible leader	148 mm nominal length, 4 mm diameter
Compatible conduits	PVC, plastic and metal tubes with compatible cross-sections and bends
Included accessories	2 steel double-loop cable grips with red adjustment sleeve
Pack size	1 fish tape of 15 m + 2 cable grips
Format	Coiled fish tape, without reel
Conditions of use	Work with the circuit de-energized
Measurements	Nominal, according to supplier documentation

Applications

Wall cabling
Feeding and pulling cable through tubes and pull boxes with compatible clearance.

Conduits under floors or above ceilings
Guiding aid for prepared routes during installations and renovations.

Networks and telecommunications
Installation of data and CCTV cabling through compatible raceways.

Replacement of damaged cable runs
Feed a fish tape into the cleared conduit to pull the replacement cable, checking for unobstructed passage and allowable pulling force.

Packaging & contents

1 kit: 1 fish tape of 15 m with flat terminals and 2 steel cable grips with red sleeves. No reel. Cables and conduits not included.

Warranty

KONGIA 5-year warranty.
