KG-TS-TB-16

Oxford 1680D

20 × 30 × 5 cm

Product overview

Tool storage for real jobs. This heavy duty 1680D Oxford tool belt with suspenders combines tool pouches, pockets and loops to separate screws, nails, a tape measure, pliers, a utility knife, screwdrivers, pencils, fasteners, bits and other small hand tools. Keep everyday equipment within reach without constantly searching through mixed tools.

The built-in magnetic holder offers a convenient temporary holding spot for compatible screws, nails, drill bits and small metal parts. It keeps small hardware visible and accessible during framing, repairs and installation work.

Adjustable padded suspenders help distribute tool weight across the shoulders and waist. The wide padded waist belt provides support and a secure fit when bending, kneeling or moving around the worksite. Adjust the straps and balance the load before working.

Designed for carpenters, electricians, plumbers, framers, installers and serious DIY users. The 1680D Oxford construction, reinforced stitching and black finish with orange trim and stitching suit jobsite, workshop and home maintenance tasks. Contrasting orange trim highlights the pocket openings.

The sales unit is the belt with its pouches, hammer holder and suspenders. Tools shown in the images demonstrate use and are not included.

Key features

- Multi-pocket tool storage: pouches, pockets and loops organize everyday hand tools, fasteners and consumables.
- 1680D Oxford material: high-density fabric and reinforced stitching for organizing tools during demanding tasks.
- Built-in magnetic holder: temporarily keep compatible screws, nails, bits and small metal parts within reach.
- Adjustable padded suspenders: help distribute weight between shoulders and waist and keep the system stable as you move.
- Wide padded waist belt: adjustable support keeps tools close while allowing both hands to remain free.
- Practical holders: central metal hammer loop, tape measure clip and separate easy-access compartments.
- Black-and-orange finish: orange trim and stitching give the pocket layout a clearly defined professional finish.

Applications

Carpentry and framing - Organize nails, screws, a tape measure, pencils and hand tools.

Electrical work, plumbing and low-voltage installation - Keep tools and fixings close during assembly.

Construction, repairs and maintenance - Carry selected tools between work areas.

Workshop, garage and DIY - Separate small tools and consumables during projects and home improvements.
