KG-NT-WT-200 PRO

3 years

3-year KONGIA warranty for KG-NT-WT-200 PRO.

Digital tracing · complete kit

DIGITAL NETWORK TRACER
Adjustable sensitivity · PoE · 3-year warranty
Automatic wake-up wire mapping
KG-NT-WT-200 PRO

Key benefits

- Digital network cable tracing
- Adjustable sensitivity using a rotary control
- PoE anti-interference tracing function
- PoE burnout protection
- Intelligent automatic wake-up wire mapping without manual mode switching
- Complete kit with a 3-year KONGIA warranty

OEM design concept; finish subject to production sample.

Technical specifications

Instrument type	Digital network cable tracer with wire mapping
Sensitivity	Adjustable using the receiver rotary control
PoE and protection	Anti-interference function and PoE burnout protection
Wire mapping	Intelligent automatic wake-up without manual mode switching
Tracing range	Up to 1000 m of cable length; depends on the cable and conditions
PoE energized wire mapping	Up to 60 V on compatible lines, following the equipment procedure
Wire indicators	1-8 and G on transmitter and receiver
Connectors	RJ45 and RJ11 on transmitter; RJ45 on receiver
Receiver tip	Non-metallic ABS
Power supply	One 9 V battery for the transmitter and one 9 V battery for the receiver
Sales unit	Complete kit with included accessories
OEM finish	KONGIA orange housing, navy face panels and Spanish labels
Warranty	3 years

Kit contents

Complete kit: transmitter ×1; receiver ×1; RJ45 adapter cable ×1; RJ11 adapter cable ×1; alligator-clip cable ×1; carrying pouch ×1; user manual ×1; 9 V batteries ×2.

3-year KONGIA warranty for KG-NT-WT-200 PRO.

Applications

Racks and patch panels

Locate the corresponding cable, then check wire correspondence without manually changing the mode.

Network installations with PoE

Trace with an anti-interference function and instrument protection against PoE damage during intended use.

Network and telephone cabling

Identify cables and check wire correspondence using the RJ45 and RJ11 ports and adapter cables.

Cabling maintenance

Adjust sensitivity to narrow the search among multiple cables before checking the wires.

Frequently asked questions

What makes KG-NT-WT-200 PRO different?

It is a digital network cable tracer with adjustable sensitivity, anti-interference, PoE burnout protection and intelligent automatic wake-up wire mapping.

What is sensitivity adjustment for?

It lets you narrow the detection area during tracing. Reduce sensitivity as you approach the target cable to compare signals from nearby cables.

Do I need to switch manually to wire mapping?

No. Intelligent wake-up activates wire mapping automatically without manually configuring a mode change.

What does PoE protection mean?

The instrument includes anti-interference and PoE burnout protection. Follow the user manual; this function does not make it a tester for mains-voltage circuits.

What is included in the kit?

The kit includes a transmitter, receiver, RJ45 and RJ11 adapter cables, alligator-clip cable, carrying pouch, user manual and two 9 V batteries.

What is the warranty?

KG-NT-WT-200 PRO has a 3-year KONGIA warranty.

What does the 1000 m range mean?

It is a tracing range along the cable, not a wireless range or a cable-length measurement. Results depend on the cable and working conditions.
